REACH and RoHS Compliance Declaration (November 2010)

F.A.O. All Customers,

Burnett & Hillman are dedicated to supplying high quality hydraulic adaptors that meet environmental regulations, including RoHS (Restriction of Hazardous Substances) Directive, EU Directive 2002/95EC, and REACH (Registration, Authorisation and Restriction of Chemicals), EU Regulation (EC) 1907/2006.

Unless otherwise agreed all materials used for parts, manufactured or supplied by Burnett & Hillman after February 2006, comply with the relevant RoHS and REACH threshold limits.

RoHS Compliance

- Hexavalent passivate has been replaced by Trivalent (currently MacDermid ELV1500)
- Free machining leaded steels used for parts contain max 3500ppm Lead (typically 2800ppm)

REACH Compliance

- Under the structure of REACH regulation, Burnett & Hillman are manufacturers and suppliers of 'articles' to our customers, we do not manufacture 'substances' or 'preparations' and our articles do not involve the 'intentional release of substances'. Accordingly, we foresee no registration or pre-registration requirements for the products we currently supply.
- Burnett & Hillman will monitor products supplied for the occurrence of 'Substances of Very High Concern' (SVHC), as defined by REACH. This will be an ongoing process as the complete list will be released in stages.

Any further enquiries can be sent by email to adamhughes@burnettandhillman.co.uk

Thank you for your continued support and understanding,

Adam Hughes

Quality Assurance manager
