## PPWR Compliance Statement

### Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)

Burnett and Hillman are committed to taking reasonable steps to ensure that the packaging used in the supply of its products is designed, specified and managed in accordance with the applicable requirements of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR).

This statement applies to packaging placed on the market in connection with Burnett and Hillman products, including primary, secondary and transport packaging, where such packaging is supplied to customers or placed on the European Union market.

Burnett and Hillman will take reasonable steps to ensure that applicable packaging is designed and specified to minimise unnecessary weight and volume while maintaining product protection, safe handling, transport integrity and customer requirements.

Where relevant, packaging materials shall be selected with regard to recyclability, material recovery and the progressive requirements of the PPWR, including future recyclability performance expectations and recycled-content obligations for plastic packaging where these apply.

Burnett and Hillman will work with packaging suppliers to obtain appropriate supporting information, declarations or technical evidence relating to packaging composition, recycled content, recyclability and any applicable restrictions on substances of concern, including heavy metals and other restricted substances where relevant.

Burnett and Hillman recognise that PPWR requirements will apply progressively from 12 August 2026 and that certain detailed obligations, including recyclability assessment and recycled-content targets, will be phased in over subsequent years. This statement will therefore be reviewed and updated as implementing measures, customer requirements and supplier evidence develop.

**Declaration:** Based on the information currently available, Burnett and Hillman are committed to managing its packaging obligations in line with Regulation (EU) 2025/40 and to maintaining appropriate evidence to support compliance where applicable.
